Vol. 20 JOURNAL OF ANALYTICAL AND APPLIED PYROLYSIS JULY 1991

Special Issue

Proceedings of the 9th International Conference on Fundamental Aspects, Analytical Techniques, Processes and Applications of Pyrolysis, Noordwijkerhout, The Netherlands, June 11–15, 1990

PART I, Volume 19

Preface
J.J. Boon xi

Mechanisms and Time Scales

Analysis of coal by thermogravimetry–Fourier transform infrared spectroscopy and pyrolysis modeling
P.R. Solomon, M.A. Serio, R.M. Carangelo, R. Bassilakis, Z.Z. Yu, and S. Charpenay (East Hartford, CT, USA) and J. Whelan (Woods Hole, MA, USA) 1
Solid state pyrolyses. Part 2. Solid state kinetics studied by pyrolysis–gas chromatography
L. Carlsen, A. Feldthus and P. Bo (Roskilde, Denmark) 15
Mechanistic modeling of the pyrolysis of *n*-hexane
F. Billaud, K. Elyahyaoui and F. Baronnet (Nancy, France) 29

Biomacromolecules

Fast pyrolysis of natural polysaccharides as a potential industrial process
D. Radlein, J. Piskorz and D.S. Scott (Waterloo, Ont., Canada) 41
Characterisation of oligomers and sugar ring-cleavage products in the pyrolysate of cellulose
J.A. Lomax, J.M. Commandeur, P.W. Arisz and J.J. Boon (Amsterdam, The Netherlands) 65
Vacuum pyrolysis of cellulose: Fourier transform infrared characterization of solid residues, product distribution and correlations
S. Julien, E. Chornet, and P.K. Tiwari (Sherbrooke, Que., Canada) and R.P. Overend (Ottawa, Ont., Canada) 81
Quantitative analysis of saccharides in wood pulps by quartz-tube pulse pyrolysis–polar phase gas chromatography
J. Kelly, M. Mackey and R.J. Helleur (St. John's, Nfld., Canada) 105
Thermal degradation of chitin and cellulose
P. Köll, G. Borchers and J.O. Metzger (Oldenburg, Germany) 119
Pyrolysis of various furan model compounds
R. Schrödter and W. Baltes (Berlin, Germany) 131
Characterization of chemical and mechanical pulps by pyrolysis–gas chromatography/mass spectrometry
M. Kleen and G. Gellerstedt (Stockholm, Sweden) 139
Micro-analytical investigations on lignin in enzyme-digested tobacco lamina and midrib using pyrolysis–mass spectrometry and Curie-point pyrolysis–gas chromatography/mass spectrometry
M.A. Scheijen and J.J. Boon (Amsterdam, The Netherlands) 153
An analytical pyrolysis mass spectrometric study of *Eucryphia cordifolia* wood decayed by white-rot and brown-rot fungi
M.M. Mulder, J.B.M. Pureveen and J.J. Boon (Amsterdam, The Netherlands) 175
Pyrolysis–gas chromatographic analyses of organic matter in soils using nitrogen-selective detection
E. Granada, J. Blasco, L. Comellas and M. Gassiot (Barcelona, Spain) 193

Pyrolysis–gas chromatography/mass spectrometry of lignocellulosics in forages and by-products
G.C. Galletti (Bologna, Italy) and J.B. Reeves III (Beltsville, MD, USA) 203
A microanalytical approach to plant tissue characterization: a comparative study of healthy and fungus-infected carnation by pyrolysis–mass spectrometry
G.J. Niemann (Baarn, The Netherlands), J.J. Boon, J.B.M. Pureveen, G.B. Eijkel and E. van der Heijden (Amsterdam, The Netherlands) 213
2-Butenoic acid, a chemical marker for poly-β-hydroxybutyrate identified by pyrolysis-gas chromatography/mass spectrometry in analyses of whole microbial cells
B.E. Watt, S.L. Morgan and A. Fox (Columbia, SC, USA) 237

Polymers

Sequence of phenolic units in phenol–formaldehyde polycondensates studied by pyrolysis–gas chromatography/mass spectrometry
M. Blazso and T. Tóth (Budapest, Hungary) 251
Phenol–formaldehyde resins as a link to the understanding of the isothermal kinetic behavior of geopolymers (kerogens and coals)
H. Bar and Z. Aizenshtat (Jerusalem, Israel) 265
Identification of polar monomers in poly acrylate dispersions with pyrolysis–gas chromatography/mass spectrometry
G.J.Q. van der Peyl and T.C.T. Linnartz (Geleen, The Netherlands), C.A.J.J. van Rossum and M. Zeelenberg (Zwolle, The Netherlands) 279
Thermal degradation mechanisms of amphiphilic acrylic copolymers studied by temperature-resolved pyrolysis–field ionization mass spectrometry
B. Plage and H.-R. Schulten (Wiesbaden, Germany) 285
Natural rubber pyrolysis: study of temperature- and thickness-dependence indicates dimer formation mechanism
S.A. Groves and R.S. Lehrle (Birmingham, UK), M. Blazsó and T. Szekély (Budapest, Hungary) 301
Monomer recovery by pyrolysis of poly(methyl methacrylate)
W. Kaminsky and J. Franck (Hamburg, Germany) 311
Trimer formation studies in polystyrene pyrolysis reveal that time-resolved mass spectrometry can be misleading
D.J. Atkinson and R.S. Lehrle (Birmingham, UK) 319
Sample size dependence in pyrolysis: an embarrassment, or a utility?
R.N. Hancox, G.D. Lamb and R.S. Lehrle (Birmingham, UK) 333

Author Index Volumes 19 and 20 349
Subject Index Volumes 19 and 20 353

PART II, Volume 20

Preface
J.J. Boon xi

Techniques and Data Processing

Pyrolysis fast atom bombardment tandem mass spectrometry characterization of coals
R.E. Winans (Argonne, IL, USA) 1
The scope of pyrolysis methylation reactions
J.M. Challinor (East Perth, W.A., Australia) 15
Characterisation of kerogens, coals and asphaltenes by quantitative pyrolysis–mass spectrometry
T.I. Eglinton and S.R. Larter (Oslo, Norway) and J.J. Boon (Amsterdam, The Netherlands) ... 25
Laser desorption multiphoton ionization mass spectrometry
T.L. Weeding, R.J.J. Steenvoorden, P.G. Kistemaker and J.J. Boon (Amsterdam, The Netherlands) 47

IONIA: An Expert System for the prediction of the thermal decomposition of condensation polymers
M. Statheropoulos (Athens, Greece) and G. Montaudo (Catania, Italy) 57
The interpretation of pyrolysis mass spectra of polymers using a "hybrid" software system based on library searching with heuristics
M. Statheropoulos and K. Georgakopoulos (Athens, Greece) and G. Montaudo (Catania, Italy) 65
Data analysis of pyrolysis–mass spectrometric profiles generated with soft ionization detection: application to barley tissue profiles
A.C. Tas, S.A.G. Angelino, G.F. La Vos and J. van der Greef (Zeist, The Netherlands) 73
Chemometric analysis of pyrolysate compositions: a model for predicting the organic matter type of source rocks using pyrolysis–gas chromatography
N.R. Gray (Houston, TX, USA), C.J. Lancaster and J. Gethner (Annandale, NJ, USA) 87

Geomacromolecules

The decomposition of Posidonia Shale and Green River Shale kerogens using microscale sealed vessel (MSSV) pyrolysis
B. Horsfield and S.J. Dueppenbecker (Julich, Germany) 107
A comparative study of three different pyrolysis methods used to characterise a biopolymer isolated from fossil and extant dammar resins
B.G.K. van Aarssen and J.W. de Leeuw (Delft, The Netherlands) and B. Horsfield (Julich, Germany) 125
Flash pyrolysis of silcon-bound hydrocarbons
W.A. Hartgers, J.S. Sinninghe Damsté and J.W. de Leeuw (Delft, The Netherlands) 141
The characterisation of two Australian bituminous coals and isolated maceral fractions by sequential pyrolysis–gas-chromatography / mass spectrometry
J.D. Giuliani and W. Peirong (Parkville, Vic., Australia), G.R. Dyrkacz (Argonne, IL, USA) and R.B. Johns (Parkville, Vic., Australia) 151
Differentiation of Victorian brown coal lithotypes as revealed by thermally desorbable biomarkers
M. Li and R.B. Johns (Parkville, Vic., Australia) 161
Coal characterization using pyrolysis–Fourier transform infrared spectroscopy
J.V. Ibarra and R. Moliner (Zaragoza, Spain) 171
Pyrolysis and combustion kinetics of crude oils, asphaltenes and resins in relation to thermal recovery processes
M. Ranjbar and G. Pusch (Clausthal, Germany) 185

Archaelogy and Historical Objects

Molecular archaeology: analysis of charred (food) remains from prehistoric pottery by pyrolysis–gas chromatography / mass spectrometry
T.F.M. Oudemans and J.J. Boon (Amsterdam, The Netherlands) 197
Pyrolysis gas chromatographic studies on Egyptian archaeological specimens: organic patinas on the "Three Princesses" gold vessel
A.M. Shedrinsky (Brooklyn, NY, USA), R.E. Stone and N.S. Baer (New York, NY, USA) 229
Applications of analytical pyrolysis to the study of stony cultural properties
C. Saiz-Jimenez, B. Hermosin, J.J. Ortega-Calvo and G. Gomez-Alarcon (Seville, Spain) 239
Analytical pyrolysis as a tool for the characterization of organic substances in artistic and archaeological objects
G. Chiavari, G.C. Galletti and R. Mazzeo (Bologna, Italy) 253

Environmental Aspects of Pyrolysis

Determination of sulfates in urban air by pyrolysis–gas chromatography with flame photometric detection
M.G. Kim, K. Yagawa, H. Inoue and T. Shirai (Yokohama, Japan) 263

Qualitative analysis of chlorolignins and lignosulphonates in pulp mill effluents entering the river Rhine using pyrolysis–mass spectrometry and pyrolysis–gas chromatography/mass spectrometry
W.M.G. van Loon and J.J. Boon (Amsterdam, The Netherlands) and B. de Groot (Nieuwegein, The Netherlands) 275

Thermal degradation characteristics of high impact polystyrene/decabromodiphenylether/antimony oxide studied by derivative thermogravimetry and temperature resolved pyrolysis–mass spectrometry. Formation of polybrominated dibenzofurans, antimony (oxy)bromides and brominated styrene oligomers
R. Luijk, H.A.J. Govers, G.B. Eijkel and J.J. Boon (Amsterdam, The Netherlands) 303

An exploratory study of the processing of plastics, by means of pyrolysis, with the emphasis on PVC/aluminum combinations
A.B.J. Oudhuis, P. de Wit, P.J.J. Tromp and J.A. Moulijn (Amsterdam, The Netherlands) 321

Author Index Volumes 19 and 20 337
Subject Index Volumes 19 and 20 341
